# State of Louisiana Department of Transportation and Development (DOTD)

Materials and Testing Section Qualification Procedure for Qualified Products List 42

## SILICONE JOINT SEALANTS

## **MATERIAL SPECIFICATION REFERENCE:**

DOTD Standard Specifications, Subsection 601.13, 1005.02(c), and 1005.02(d) (copy attached)

### PRELIMINARY REQUIREMENTS:

## **Qualified Product Evaluation Form**

The manufacturer shall submit a standard "Qualified Product Evaluation Form" to the DOTD Materials and Testing Section Coordinator listed below, along with a letter requesting evaluation for the Qualified Products List.

### **Product Data Sheets**

Include product data sheets with all pertinent information relative to the product to be evaluated; including, but not limited to, manufacturer's specifications, mixing instructions (if applicable), recommended application procedure, typical analysis and a Materials Safety Data Sheet (MSDS).

# Certification and/or Test Reports

Submit a notarized Certificate of Analysis reporting actual test results of the material properties for each product submitted.

## Sample (to be furnished at no cost to the Department)

Submit a gallon sample of the product for evaluation.

# **TEST REQUIREMENTS:**

## Laboratory Testing

The qualification sample shall be tested in accordance with the applicable procedures shown in the attached Subsections 1005.02(c) and 1005.02(d).

## Field Evaluation

The Department may require a field evaluation to ensure satisfactory installation and performance of the product prior to placement on the Qualified Products List. Sealant characteristics checked will include the adhesion between the faces of the joint, resilience, ozone resistance, and the ability to reject incompressibles.

# **Evaluation Time**

Laboratory testing - 4 weeks Field evaluation - 18 months

#### **GENERAL:**

Upon completion of the evaluation, the submitter will be notified in writing concerning the results of the evaluation and whether the product will or will not be added to the Qualified Products List. The Department reserves the right to reevaluate any product at any time.

## PROJECT ACCEPTANCE REQUIREMENTS:

Qualification of a product is not blanket approval for its use.

All joint material regardless of prior approval, shall be sampled in accordance with the Materials Sampling Manual. See DOTD S611 for details. Sampling for acceptance may be performed at the joint material supplier's in-state warehouse. When pre-sampled in this manner, each DOTD lot of joint material shipped to the jobsite shall be accompanied with a Certificate of Delivery. This Certificate of Delivery shall include the test report number which indicates conformance to specifications and represents the material shipped.

When joint material has not been pre-sampled at the joint material supplier's in-state warehouse, the Project Engineer shall take samples at the project site in accordance with DOTD S611.

### **DISQUALIFICATION:**

Any product may be removed from the Qualified Products List for non-conformance with specifications or performance requirements. The Department must be notified in writing of any change in product formulation. Significant changes may require reevaluation of the product.

## REQUALIFICATION:

A product which has been disqualified and removed from the Qualified Products List will be considered for reevaluation only after submission of a formal request along with acceptable evidence that the problems causing the disqualification have been resolved.
